

Coordination Committee for the March

Towards the political unity of the planet

Dear friends,

Current geopolitics events remind us how incoherent the present political organisation of the world is. Multilateralism is indeed far better than imperialism, but our planet carries on being more than ever the enclosed field of rivalry between great powers... stirred up by local crises of all sorts. The incapacity of the U.N. as well as G7, G8 or G20 to bring these crises under control is blatant ! Only the transnational financial powers are in a position to reinforce their dominant power...

The unhappy inhabitants of Planet Earth, are the ones who endure the consequences of the disorder of the international community : day after day the balance of their lives may be disrupted. Except for a few who are the the élite of the world, a great part of the inhabitants of the Earth worries about tomorrow, if not about their mere survival...

Therefore it is not surprising to see the natural trend to withdraw into oneself spreading at all levels : individual, local, and national. The watchword of solidarity has become : « protect yourself against foreign threats », and is paving the way to the rise of populism.

Tirelessly, day after day, we have an obligation to proclaim that the balance of the world will now come from the political unity of the planet, hand in hand with the diversity of peoples. It is the way we recommend, briefly summed up in the attached document. It is a collective effort we are calling for; no doubt it will succeed. We are happy we started it up with you !

All the best from

The March Team
